PrestoPRIME Workshop Outcomes

ORF-Zentrum (ORF-Centre) - Room 1027 ("ORF-ATRIUM") -
Würzburggasse 30, 1136 WIEN

Mon October 5th - The PrestoPRIME project and its Competence Centre

Presentation of technical work packages

PrestoPRIME research is driven by user scenarios, which were presented and discussed in focus groups on day 2 of the workshop.

Audiovisual preservation strategies

Richard Wright, BBC (UK), Sr Research Engineer Research & Development

- digital technology - the solution to analogue preservation, and the new problem
- digital library technology - what it can and cannot do (without PrestoPRIME)
- digital preservation technology - what it means for audiovisual content

Implementing audiovisual preservation

Matthew Addis, IT-Innovation (UK), Project Manager in Collaborative R&D

- preservation workflow - the structure for preservation decisions and actions
- quality control - preserving the content, not just the files
- migration and emulation - what they are, their complementary roles
- storage - long-term control of short-term technology: rule-based storage

Digital access metadata

Werner Bailer, Joanneum Research (Austria), Digital Media Researcher

Audiovisual media has a time dimension:

- time-based media require time-based metadata
- and require play-back, citation and annotation
- which also must all be time-based, with time-based metadata

Audiovisual media has other essential metadata requirements:

- can you find it? linked data, the semantic web and legacy catalogues
- do you own it? content provenance, fingerprinting, registries
- can you use it? rights modelling and rights management automation

Putting it all together

Walter Allasia, Eurix (Italy), Project Manager Research

How to build and assess a complete PrestoPRIME implementation:

- proving tools work in a PrestoPRIME testbed
- proving tools work in the real world: Ex Libris integration
